

H30 年度 SUIJI 理事表敬訪問の際の理事あいさつ

H30 年 8 月 31 日 (金) 10 : 15~

Hello. How are you?

I am a vice president of Kochi University, Kazuo OKUDA, and I am glad to have all of you today. Because I think it is very nice for me to listen to your presentations.

I understand that you have taken part in the SUIJI service learning program and the International Science Training program, where students coming from three different countries, Indonesia, Malaysia and Japan study together.

In this time, you have divided into two separate groups and visited two different rural districts, Yasuda and Muroto.

During 10 days at these sites, I think that you have made a lot of valuable experience and learning through the regional nature, culture and tradition, various activities and communication with people living in the village and international close relationships between students.

You have now known things you never knew so far and promoted much more knowledge and abilities to think how to realize sustainable societies in regional areas and worldwide.

I really hope what you got in these programs will be useful for your future carrier.

Thank you very much
